GetExamDates	Main Flow of Events:

	The use case starts when current time reached one week from last event. System checks if exam dates have been published by Town Office. IF exam dates are accessible System downloads exam dates to its database. System sets exam dates in database as available. Alternative Flows: If exam dates were not accessible, Manager is informed and Time starts
	counting another one week period.

■ PayThroughGate	Main Flow of Events: 1. The use case starts when Pay is invoked by another use case and the gate option is chosen. 2. RegisteredUser is redirected to the PayGate. 3. RegisteredUser is asked to provide his/her credentials. 4. IF the credentials are recognized and correct 4.1 RegisteredUser is presented with a form of payment to fill in. 4.2 IF RegisteredUser chooses "Pay", 4.2.1 PayGate tries to proceed with the payment. 4.2.2 IF the payment was successful 4.2.2.1 RegisteredUser is notified about successful operation and money is transferred. 4.2.3 ELSE 4.2.3.1 RegisteredUser is notified about a problem. 4.3 ELSE IF RegisteredUser chooses "Cancel" 4.3.1 Operation is canceled. Alternative flows: If the credentials were not recognized or incorrect, RegisteredUser is prompted again.
PayWithCash	
Pay	
■ LogIntoCourse	Main Flow of Events: 1. The use case starts when a RegisteredUser chooses "Log Into Course". 2. System returns lists of available courses. 3. RegisteredUser chooses a course. 4. IF RegisteredUser meets course preconditions 4.1. System displays price and other details. 4.2. INCLUDE Pay

	4.3. IF Payment was successful4.3.1. Send application to Manager for approval.4.3.2. IF Manager approves4.3.2.1. Assign RegisteredUser to course.
	Alternate Flows: If RegisteredUser does not meet course preconditions, system display message and returns to previous menu. If Payment was not successful three days before course starts, application is canceled. If Manager does not approve, application is canceled.
